PROFILE

Creative problem solver, looking to further in a career as a full stack developer. I am inspired by socially minded businesses and social entrepreneurship. I am an enthusiastic learner who thrives in diverse work environments. I am very interested in the human mind and my past education in Developmental Psychology has only strengthened this curiosity. My dream job is one that marries design thinking, software development, and psychology. I like to be engaged, work hard and have fun.

TECH

Go	RESTful API
Javascript	Android Studio
Angular	Java
Node.js	Python
CSS	
HTML5	
PostgresSQL	

PROFESSIONAL EXPERIENCE

Bitly
Backend Engineer Intern
summer 2017

- I worked on a 8 person team within the Backend Engineering group focused on mobile feature development. This included creating code to support new deeplinking features, assisting in user management framework, squashing bugs and learning the internal programming guidelines for the company.
 - Assisted in creating unit tests in Go.
 - Built a concept mobile application for Android that parses text from an image using the MS Azure Image Processing API, looking for a URL and shortens the link consuming the Bitly API.
 - Experienced Agile sprints using JIRA as a management software
 - Participated in coding reviews and discussions of best practices
-
- Supporting students and entrepreneurial members in daily campus operations
 - Assisting in event management by coordinating and carrying out event set-up

Galvanize
Community Coordinator
Aug 2015 - Oct 2016

PROJECTS

Spot Ninja
spotninja.firebaseio.com
find paid parking, store their favorite parking locations, and benefit from crowdsourced free parking
{ Angular / MySQL / JavaScript / Bootstrap }

Snaply
github.com/BitlyHackWeek/BitlyApp
Take a picture of a link, shorten it and save the link as an event.
